PROFESSIONAL SUMMARY

Flutter Developer with 4+ years of experience delivering production-grade, cross-platform mobile applications for iOS and Android. Specializes in Clean Architecture, responsive UI development, and advanced state management using Provider, BLoC, and Riverpod. Proven track record of integrating complex business systems, including Odoo ERP, Firebase, and real-time Socket.IO services, into scalable Flutter solutions. Adept at leading Agile teams and mentoring junior developers to deliver high-quality products that solve real-world business workflows. **Actively seeking international opportunities and fully willing to relocate immediately.**

PROFESSIONAL EXPERIENCE

Senior Mobile Flutter Developer

2023 - Present

| Asia Matrix Co., Ltd

Architected and delivered 3 production-grade Flutter apps, establishing foundational code structures, CI/CD pipelines, and robust state management strategies for a 6-person product team.

Managed the complete client-facing lifecycle for 3 major projects, from mapping out raw business workflows to final product sign-off, ensuring technical solutions directly solved client pain points.

Acted as a technical mentor for 2 junior developers, driving team code quality up through structural code reviews, hands-on pair programming, and structured onboarding.

Built high-performance UI and asynchronous workflows by scale-fitting Riverpod, BLoC, and Provider patterns based on specific project requirements to keep codebases decoupled and clean.

Revamped legacy code to slash app launch times by 20% and drastically cut down production crash rates, visibly lowering technical debt and improving long-term system stability.

Junior Mobile Flutter Developer |

2022 - 2023

Asia Matrix Co., Ltd

Delivered 3+ Flutter applications across HR and distribution domains, contributing to cross-platform iOS and Android coverage under senior developer guidance.

Integrated 4 API services including Odoo ERP, Google Maps, AppsFlyer, and payment gateway into 5 production apps, enabling real-time data sync, offline support, and reliable app behavior.

Implemented 4 third-party services including Google Maps API, OneSignal push notifications, OAuth authentication, and Socket IO across 3 client applications, improving notification delivery and backend performance.

Collaborated with a 6-person Agile team comprising designers, product managers, and back-end engineers to translate business requirements into scalable mobile features.

SKILLS

| | |
|---------------------|---|
| Mobile | Flutter, Dart, Kotlin |
| Architecture | Provider, BLoC, Riverpod, Clean Architecture, MVVM, asynchronous programming, performance optimization |
| Integrations | RESTful APIs, Odoo ERP, Firebase, Socket IO, OneSignal, Google Maps API, OAuth, MCP Integration, Cloudflare captcha |
| Databases | MySQL, SQLite, MongoDB, PostgreSQL, Supabase |
| Others | Python, HTML, CSS, Java J2EE, JavaScript, PHP |
| Tools | GitHub CI/CD, Postman, Figma, Travis CI, Proxy Man, k6, Codex, Claude Code, Agile, Scrum |
| Languages | Myanmar (native), English (Professional Working Proficiency) |

EDUCATION

| | |
|---|-------------|
| B.Sc. Computing Edinburgh Napier University | 2019 - 2021 |
| Higher National Diploma (H.N.D), Pearson Info Myanmar University | 2018 - 2019 |
| Higher National Certificate (H.N.C), Pearson Info Myanmar University | 2017 - 2018 |
